

**NEWEST, MOST CONVENIENT WAY  
TO PRACTICE IN MANHATTAN . . . AND**

***pay only for the  
time and services you use***

---

**NOW**

A distinguished building at a prestige address, beautifully furnished and fully equipped for the practice of medicine. It's the new 6-story air-conditioned Lexington Professional Center, in a prime location, easily reached by bus, subway, or car.

**SUPERB FACILITIES**

Everything you expect of a well-equipped medical center, from laboratory to x-ray to an ethical pharmacy. Plus all the services you might require: receptionists, a dependable, resourceful answering service, appointment scheduling, and much, much more. Private nursing and secretarial services are also available.

**INTERESTING EXTRA**

A large, comfortable club room for conferences, paper work, exchange of ideas, or just relaxing . . . yours at all times without charge.

**THE COST TO YOU  
IS PHENOMENALLY LOW**

You pay only for the hours and services you require, plus a nominal monthly charge. And remember . . . no capital investment, no leases to sign, no office management problems.

**IF YOU'RE NOT USING  
YOUR OFFICE FULL-TIME**

If you want to see some patients in Manhattan, if you're studying for a specialty or have a job and see patients in your free time . . . the Lexington Professional Center is the most convenient and most sensible way to have a modern office in a prime location.

**WHY NOT WRITE OR CALL NOW?**

Just phone Mrs. Ruth Freund, Executive Director, at UN 1-9000 or write. We'll be glad to have you visit us at your convenience or we'll come to your office.

**LEXINGTON PROFESSIONAL CENTER**

**133 E. 73rd ST., NEW YORK 21, N. Y.**

**TRAUMA!**

**relieves  
pain  
and  
relaxes  
muscle**

Following traumatic injury, patient comfort can be increased and recovery time shortened by the simultaneous treatment of both pain and muscle spasm with 'Soma' Compound.

## **Soma® Compound**

carisoprodol 200 mg., acetophenetidin 160 mg., caffeine 32 mg.

Also available with ¼ gr. codeine as **SOMA® COMPOUND WITH CODEINE**: carisoprodol 200 mg., acetophenetidin 160 mg., caffeine 32 mg., codeine phosphate 16 mg. (Warning: may be habit forming).

 **WALLACE LABORATORIES**  
Cranbury, N. J.

**Side effects:** Although there have been no reports of addiction to Soma Compound, tolerance, withdrawal symptoms, or other effects characteristic of narcotic addiction, 'Soma' Compound and Codeine, like other central nervous system depressants, should be used with caution in patients with a history of alcoholism. While codeine addiction is extremely rare, if the habit is broken, the same precautions should be observed as with any other opium alkaloid. Nausea and vomiting are possible codeine side effects. If continued use is necessary, the following precautions should be observed: None reported.

**Contraindications:** None reported.

**Warnings:** Information available in the product literature should be read by physicians upon request.

**Dosage:** The usual dosage is 1 or 2 tablets 4 times daily.

**Availability:** Soma Compound is available in orange, carisoprodol 200 mg., acetophenetidin 160 mg., caffeine 32 mg. bottles of 50. 'Soma' Compound with codeine (order form required) is available in bottles of 50.

# FORMULATED TO RELIEVE THE HEADACHE and NAUSEA OF MIGRAINE

---

## 'Migral'<sup>®</sup>

Each sugar-coated 'MIGRAL' tablet contains:

Ergotamine Tartrate ..... 1 mg.  
'Marezine'<sup>®</sup> brand Cyclizine Hydrochloride ..... 25 mg.  
Caffeine ..... 50 mg.

In bottles of 20 and 100 tablets.

**Relieves migraine and other vascular headaches**  
**and relieves nausea and vomiting associated with migraine or**  
**caused by administration of ergotamine.**

**Contraindications:** Peripheral vascular disease, severe arteriosclerosis, coronary heart disease, hypertension, impaired liver or kidney function and during pregnancy.

**Precaution:** It is recommended that not more than 6 tablets be taken during a single attack, nor more than 10 tablets per week.

When you decide your patients' dietary fat should be modified, remember...

## Fleischmann's is Lowest in Saturated Fat of the nation's leading margarines

Fleischmann's is made from 100% corn oil. Over half of this remains in liquid form for high linoleic content...the balance is partially hydrogenated for flavor and spreadability. Consequently, Fleischmann's is a "special" margarine, lowest in saturated fat of the nation's leading margarines. A "special" margarine is one of the most important sources of polyunsaturates in the average diet. Only Fleischmann's offers all of these extra benefits:

(1) **Exceptionally high P/S ratio**...Fleischmann's Margarine has a 1.7 to 1 ratio (27.5% cis, cis linoleic acid). Using Fleischmann's instead of butter or regular margarines increases intake of polyunsaturates while lowering intake of saturated fat.

(2) **Made from 100% corn oil**...The only oil used in making Fleischmann's is 100% corn oil. Some so-called corn oil margarines are mixtures of cottonseed or soybean oil with corn oil.

(3) **Light delicate flavor**...Delicious taste has made Fleischmann's America's largest selling "special" margarine.

(4) **Lightly Salted and Unsalted**...Fleischmann's comes both ways. What's more, Fleischmann's Unsalted Margarine is dietetically sodium-free. It's located in the *frozen food section*.

(5) **National availability**...Unlike most brands, both Fleischmann's can be found in virtually every food store in America.

Lightly Salted in golden package

Unsalted in green foil package

*"What did you  
call this—  
a tranquilaxant drug?"*

*Trancopal "is effective in the symptomatic treatment of anxiety."\* Trancopal has tranquilizing properties similar to those of other mild tranquilizers.\**

*"Yes, it's a  
dual-purpose drug  
that will calm you down  
and also relax  
those taut muscles."*

**Indications:** Anxiety and tension states, ulcer syndrome, premenstrual tension, dysmenorrhea, alcoholism, skeletal muscle spasm, low back pain, rheumatoid arthritis, osteoarthritis, disc syndrome, torticollis, bursitis, neurologic disorders.

**Dosage and Administration:** Adults, 1 Caplet® (200 mg.) three or four times daily; in some patients 100 mg. three or four times daily suffices. Children (5 to 12 years), from 50 to 100 mg. three or four times daily.

**Precautions:** Side effects such as occasional drowsiness, dizziness, flushing, nausea, depression, weakness and drug rash have been observed in less than 3 per cent of patients. If severe, medication should be discontinued. In most patients, however, side effects are minor and do not necessitate interruption of treatment. There are no known contraindications.

**Available:** 200 mg. Caplets (green colored, scored), 100 mg. Caplets (peach colored, scored), each in bottles of 100.

\*A.M.A. Council on Drugs: J.A.M.A. 183:469 (Feb. 9) 1963.

Posed by professional models.

"In other words, this medication, Trancopal, acts both as a tranquilizer and as a muscle relaxant. As a tranquilizer, it exerts a calming effect, easing emotional tension and anxiety. As a muscle relaxant, Trancopal relaxes the muscle spasm which is so frequently a part of emotional tension. Another important fact about Trancopal is that it doesn't change one's normal mood — almost never causes euphoria, any sort of intoxicating sensation, or depression."

***Some allergic patients need more relief  
than a single antihistamine can give***

For more complete relief, consider the antiallergic formula that includes a vasoconstrictor in addition to two antihistamines. The vasoconstrictor ingredient in Co-Pyronil acts to relieve swelling and to control edema, which are common symptoms of nasal allergies, urticaria, and minor drug reactions. Co-Pyronil also quickly provides more complete relief when nasopharyngeal swelling is responsible for secondary symptoms of earache or sinus headache.

***Co-Pyronil®***  
***Pyrrobutamine Compound***

**Side-Effects:** Drowsiness is sometimes reported at the beginning of treatment but is usually transient. In rare instances, symptoms of sympathetic overstimulation may be noted from the vasoconstrictor ingredient in Co-Pyronil.

**Precautions and Contraindications:** Sensitivity to antihistamines has occurred but is rare. Co-Pyronil should be used with caution in the presence of hypertension, cardiovascular-renal disease, and hyperthyroidism. As with any preparation containing antihistamines and sympathomimetics, overdosage may produce excessive central-nervous-system depression or stimulation.

Each Pulvule® contains Pyronil® (pyrrobutamine, Lilly), 15 mg./Histadyl® (methapyrilene hydrochloride, Lilly), 25 mg./Clopane® Hydrochloride (cyclopentamine hydrochloride, Lilly), 12.5 mg.

Additional information available upon request.

The One Tranquilizer that Belongs in Every Practice

# Miltown® (meprobamate)

... practical  
for control  
of anxiety  
and tension

■ Relieves anxiety and tension without significant effect on alertness and reflexes—especially valuable in the working patient.

■ Established and accepted—more than ten years' use, more than 1500 published papers confirm its value.

■ Broad therapeutic range—may be used whenever anxiety and tension are present, with or without organic disease, in any age group from pediatric to geriatric.

■ Relaxes both *physical* and *emotional* tension, thus helping to establish normal sleep patterns.

■ Proven safety/efficacy ratio—low toxicity, minimal side effects, useful in long-term therapy.

**Side effects:** Slight drowsiness may occur and, rarely, allergic or idiosyncratic reactions, generally developing after 1 to 4 doses of the drug.

**Contraindications:** Previous allergic or idiosyncratic reactions to meprobamate contraindicate subsequent use.

**Precautions:** Should administration of meprobamate cause drowsiness or visual disturbances, the dose should be reduced. Operation of motor vehicles or machinery or other activity requiring alertness should be avoided if these symptoms are present. Effects of excessive alcohol may possibly be increased by meprobamate. Prescribe cautiously and in small quantities to patients with suicidal tendencies. Massive overdosage may produce lethargy, stupor, ataxia, coma, shock, vasomotor and respiratory collapse. Consider possibility of dependence, particularly in patients with history of drug or alcohol addiction; withdraw gradually after prolonged use at high dosage. *Complete product information available in the product package, and to physicians on request.*

**Usual adult dosage:** 1 or 2 400 mg. tablets t.i.d.

**Supplied:** 400 mg. scored tablets, 200 mg. coated tablets.

WALLACE LABORATORIES/Cranbury, N. J.

most handkerchiefs agree:

life for the allergy patient is easier with

# **'PERAZIL'<sup>®</sup>** brand **CHLORCYCLIZINE HYDROCHLORIDE**

**USES:** Relieves the symptoms of sneezing, "incessant" itching, inflamed eyes, rhinorrhea, itching eyes, nose and throat, associated with:

*Hay Fever • Pollenosis • Pruritus  
• Urticaria • Vasomotor Rhinitis •  
Allergic Dermatitis • Drug Sensitivity*

**ADVANTAGES:** Both prompt and prolonged in effect, providing symptomatic relief lasting 12 to 24 hours from a single dose.

**PRECAUTION:** When drowsiness does occur, it is generally mild and the usual precautions should be observed. No toxic effects related to either the blood-forming

organs or the cardiovascular system are produced.

**DOSAGE:** Adults and children over 8 years, 50 mg. once or twice daily as required. The dose may be increased in severe cases.

Children from 2 to 8 years, 25 mg. (one sugar-coated tablet) once daily.

Infants up to 2 years, 12½ mg. (one quarter of a 50 mg. tablet) crushed and mixed with a spoonful of jam or syrup.

**SUPPLIED:** Tablets of 25 mg., sugar-coated, bottles of 100 and 1000; Tablets of 50 mg., scored, bottles of 100 and 1000.

## in acute nausea and vomiting

Nausea and vomiting, whether induced by vertigo, dizziness or motion sickness, are effectively controlled by Dramamine (dimenhydrinate). Available in easy-to-take liquid form and the tablet form which is ideal for the traveler.

Precautions: Patients should be cautioned against operating automobiles or dangerous machinery because of possible drowsiness. Dimenhydrinate, notably nontoxic itself, may mask the symptoms of streptomycin toxicity.
